DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Butterworth (5,570,546) or Kelly (4,051,525).

Butterworth teaches a system for raising and lowering cell phone equipment to the top of a pole with power and control connectors running through the pole between a control base and the pole mounted devices. Kelly teaches a similar concept for a pole mounted surveillance camera.

Allowable Subject Matter

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The polarity change recited in claim 3 and the current variation of claim 4 are not taught or fairly suggested by the prior art of record.
